--Included with this specification and incorporated herein by reference is a
computer program listing appendix on CD-R. The appendix contains computer source
code for a program executing on PC 45 in accordance with one embodiment of the
invention. Generally, the code comprises routines for retrieving, buffering, and playing
.WAV flight information files on a direct memory access SoundBlaster-type card,
including routines to start and stop local area network communications and check the
age of flight information files.--

IN THE CLAIMS:

Please amend claim 11 and 13 as follows:

Subj
3
11. (Amended) A computer-readable medium containing instructions for
controlling a data processing system to perform a method for audible announcement
generation, the method comprising the steps of:

- a) storing flight information in a signal conversion database;
- b) retrieving flight information from the signal conversion database;
